General Workforce Training		
The general contact workforce describes those who, as part of their job are likely to come into contact with children, young people and other family members. The frequency of the contact will vary, but these workers will not usually be involved in any in-depth personal work with them, or have an in-depth knowledge of their circumstances. Workers in the General Contact Workforce need to have the confidence and awareness to recognise when a child or young person may be in need of protection, and know how to respond.
